Depth	350mm	390mm	390mm
Height	650mm	520mm	800mm

A large unit ideal for high volumes of waste.

We've been supplying to the NHS since 1998

It's a partnership we're extremely proud of. And you can find plenty of our Hybrid Sackholders in most hospitals up and down the country.

The NHS change lives. And when we're able to give back, we do. Here are some of our most memorable NHS projects:

- During the first Covid-19 lockdown, we focused all our efforts on providing the NHS with PPE bins. From 16th March to the 10th of July, we delivered around 13,000 of our capsule units and 16,000 RFG products.
- We delivered over 3000 bins in just five weeks to the new Royal Liverpool University Hospital.
- In 2011, we delivered over 8,000 bins to The Royal London Hospital.
- We supplied 1,100 sackholders to Balfour Hospital in 2019 during its construction. This hospital is Scotland's first net-zero hospital.

Hybrid Sackholders

The Hybrid Sackholder now comes with the option of a plastic or steel foot pedal!

These sackholders feature a galvanised steel lid, an ABS plastic base and a plastisol body. This creates a sackholder that's fire retardant, durable and waste-effective for clinical rubbish within healthcare environments.

Discounted NHS Pricing available

These Hybrid Sackholders get their name due to the galvanised steel lid, ABS plastic base and a plastisol body.

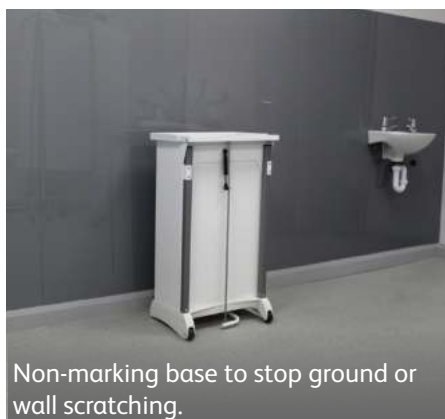

Our Hybrid Sackholders now come with the option of a plastic or metal pedal that lifts up the lid without having to use your hands.

This hybrid, fire-retardant sackholder is available in 28, 42 and 80 litre sack sizes to suit any healthcare environment and offers easy maintenance, in your choice of lid and frame colour to segregate your healthcare waste correctly.

Includes a plastisol body with a steel, rust-resistant lid.

Non-marking base to stop ground or wall scratching.

Leakproof tray for any punctured sacks to prevent leaking.
