Our Coffee Cup Bins stand apart with their unique design and modern solution to coffee cup disposal.

The **Eco Cup Recycling Bin** has three compartments for cups, lids and liquid. All waste contents go into one securely fitted bag inside the unit.

The **Deluxe Cup Recycling Bin** has 6 cup and lid collection tubes. This lets waste contents stack up inside the tubes, allowing more room for disposal.

- the vacuum-formed lid features a cup, lid and liquid collection section which can be emptied individually. The lift-off plastic lid is easy to remove and the liquid collection tube is held in place by a metal plate that allows the tube to be easily lifted out.
- The polythene fully sealed rotationally moulded body means it is fully leakproof to ensure any liquids spilt into the bin do not leak out onto the floor.
- The durable lid is formed from strong high impact polystyrene grade plastic, giving a wipe-clean surface that is easy to maintain.
- The main cup collection section for the **Eco Cup** is fitted with a metal sack retention frame and bag hooks to ensure the clear plastic sack is kept in place when cups are dropped into the slot.
- The cup tubes in the **Deluxe Cup** are connected together and lifted out as one piece. The cups can then fall into the bag, whilst the lids tube and liquid tube are removed separately to keep the waste streams segregated.

1YR PARTS & LABOUR GUARANTEE

All of our products come with a 1 year parts and labour guarantee as standard.
